## Full Website Audit Report

SEO | UX | Technical | Content | Multilingual | Performance

paraisodeaves.com | Audit Date: 26 June 2026

Pages Audited: 379 HTML files | Sitemap: 298 URLs | Languages: ES / PT / FR

Infrastructure: Netlify Static | CONFIDENTIAL

### FINAL SCORECARD

| Area                | Score /100 | Status  |
|---------------------|------------|---------|
| Technical SEO       | 62         | WARNING |
| Content Quality     | 68         | WARNING |
| Performance         | 65         | WARNING |
| UX / Mobile         | 70         | WARNING |
| Authority / E-E-A-T | 66         | WARNING |
| Image SEO           | 55         | WARNING |
| Internal Linking    | 60         | WARNING |
| Multilingual        | 48         | FAIL    |
| Conversion          | 64         | WARNING |
| OVERALL             | 63         | WARNING |

### 1 • WEBSITE STRUCTURE

**PASS** **Header** — Present and consistent across all ES pages. Logo, mega-nav, language switcher ES|PT|FR on all 379 HTML files.

**FAIL** **Navigation Inconsistency (CRITICAL)** — Blog pages (106 posts) use a completely different nav (topbar/topnav: "Loros Espana, Europa, Yaco, Guacamayos, Cacatuas, Nosotros, Contenido") vs the main site premium mega-nav. Users jumping from blog to homepage get a jarring layout shift. All 106 blog posts must use the same nav as the homepage.

**FAIL** **Blog nav broken link** — Blog topbar links to /buy-parrots-europe.html (noindex EN stub, ~76 words, no real content) labelled "Europa". Also labels /available-birds/ as "Loros Espana" — confusing to Spanish users.

|      |                                                                                                                                                                                |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| WARN | <b>Footer consistency unverified</b> — Present on main pages (5-column layout). Not confirmed across all 106 blog posts and 40 city pages.                                     |
| PASS | <b>Breadcrumbs</b> — Present on destination, city, and most blog pages. BreadcrumbList schema implemented.                                                                     |
| WARN | <b>URL consistency mixed</b> — Main site uses clean URLs (e.g. /comprar-loros-espana). But available-birds/ pages still use .html extensions — inconsistent with rest of site. |
| PASS | <b>Page hierarchy / click depth</b> — Most content reachable within 3 clicks from homepage.                                                                                    |
| WARN | <b>Mobile menu</b> — Blog and PT pages use flat topnav without a hamburger drawer. On small screens links wrap and crowd.                                                      |

## 2 · INDEXABILITY

|      |                                                                                                                                                                                                                                         |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PASS | <b>robots.txt</b> — Minimal and correct: User-agent: * / Allow: / / Sitemap pointing to sitemap.xml. No wrongly blocked folders.                                                                                                        |
| WARN | <b>sitemap.xml — 298 URLs</b> — Present and well-structured. However 44 French (/fr/) pages are completely absent from the sitemap.                                                                                                     |
| FAIL | <b>44 FR pages NOT in sitemap</b> — The entire French section (44 HTML files) has zero entries in sitemap.xml. Google cannot reliably discover FR content, severely limiting FR crawlability and indexation.                            |
| PASS | <b>noindex pages correctly marked (17 pages)</b> — 404.html, gracias.html, English stubs (about-us, 6 EN blog posts), old EN product pages, delivery-shipping.html (redirected), criadero-de-loros-espana.html (duplicate, redirected). |
| PASS | <b>Canonical tags</b> — Present on all main ES pages. Clean URL canonicals implemented for major money pages.                                                                                                                           |
| WARN | <b>available-birds/ canonical pattern</b> — These 9 pages use .html canonical while all other pages use clean URLs. Inconsistent but not blocking.                                                                                      |
| PASS | <b>_redirects (343 lines, 17 sections)</b> — Well-structured. No redirect loops detected. Catch-all /* maps to /404.html 404.                                                                                                           |
| PASS | <b>Crawl depth</b> — Content reachable within 3 crawl hops from homepage.                                                                                                                                                               |

## 3 · SEO AUDIT — META & SCHEMA

|      |                                                                                                                                                                                                                                                |
|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PASS | <b>JSON-LD structured data</b> — 359 of 379 HTML files contain JSON-LD. Excellent coverage.                                                                                                                                                    |
| PASS | <b>FAQPage schema</b> — 237 files. Strong coverage across blog, landing pages, and city pages.                                                                                                                                                 |
| PASS | <b>BreadcrumbList schema</b> — 289 files. Good coverage.                                                                                                                                                                                       |
| PASS | <b>Article schema</b> — 171 blog files with author, datePublished, publisher, image.                                                                                                                                                           |
| PASS | <b>Product schema</b> — Present on all 9 available-birds/ pages, tienda.html, and key species pages.                                                                                                                                           |
| FAIL | <b>hreflang</b> — <b>only 35% of pages have it (132/379)</b> — 247+ ES pages missing hreflang tags. The international SEO triangle ES-PT-FR is broken for most pages. Google may serve wrong language version to users in Portugal and France. |

|      |                                                                                                                                                                                                                                                       |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FAIL | <b>Twitter Cards missing on 196 pages</b> — More than half of all pages lack twitter:card meta tags. Affects social sharing appearance across all platforms.                                                                                          |
| WARN | <b>OpenGraph tags missing on ~20+ pages</b> — Missing on: 404, about-us, alimentacion/index, comportamiento/index, curiosidades/index, delivery-shipping, especies/index, gracias, guias/index, salud/index, tienda, pt/cidades/index, pt/blog/index. |
| WARN | <b>Title tag length — 15+ pages exceed 60 chars</b> — Top offenders: 89 chars, 88 chars. Google truncates at ~60 chars, reducing SERP CTR.                                                                                                            |
| WARN | <b>Meta descriptions over 155 chars (10+ pages)</b> — Will be truncated in SERPs. Target: 145-155 chars maximum.                                                                                                                                      |
| FAIL | <b>Meta description missing on EN stubs + 404.html</b> — Low crawl impact (all noindexed) but cleanup recommended.                                                                                                                                    |

## 4 • CONTENT QUALITY

|      |                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FAIL | <b>8 English stub pages in codebase (all noindexed)</b> — about-us.html (76w), african-grey-parrot-for-sale.html, blog/african-grey-parrot-price-europe.html (80w), and 5 more EN blog stubs. Recommend deleting or replacing with proper ES content.                                                                                                                                                                                     |
| FAIL | <b>3 thin money pages (CRITICAL)</b> — criadero-loros-espana.html (407 words), comprar-loros-espana.html (432 words), loros-especies.html (385 words). These target high-value commercial keywords but lack depth needed to rank page 1.                                                                                                                                                                                                  |
| WARN | <b>nosotros.html thin (530 words)</b> — The facility / About page is a critical E-E-A-T signal. Should be 1,200+ words with real facility photos and credibility timeline.                                                                                                                                                                                                                                                                |
| FAIL | <b>tienda.html shows "Mostrando 0 productos" (CRITICAL)</b> — The store page renders completely empty. JS product filter has no data or is broken. Any visitor sees zero products and bounces immediately. Highest-urgency conversion failure on the site.                                                                                                                                                                                |
| FAIL | <b>16 broken internal links -&gt; 404</b> — 9 species comparison blog posts (eclectus-vs-yaco, cactus-alba-vs-cactus-galerita, guacamayo-azul-amarillo-vs-guacamayo-escarlata, loro-gris-africano-vs-loro-amazonico, loro-amazonico-vs-eclectus, como-cuidar-un-guacamayo, cuanto-vive-un-loro-gris-africano, que-come-un-loro-gris-africano, banar-loro-guia-completa), 6 /disponibles/ sub-pages, and /cites-loros-espana.html at root. |
| WARN | <b>/disponibles/ directory linked (6 pages) but empty</b> — None of these pages exist. A 301 redirect to /tienda.html in _redirects would fix this immediately.                                                                                                                                                                                                                                                                           |
| PASS | <b>Blog content depth</b> — 70 articles, most 700-1,900+ words. 5 clusters with pillar-satellite structure for Criadero.                                                                                                                                                                                                                                                                                                                  |
| WARN | <b>No testimonials / social proof page</b> — For high-ticket purchases (300-3,000+ EUR), buyer testimonials are critical conversion elements. No testimonios.html or review widget exists.                                                                                                                                                                                                                                                |

## 5 • IMAGE SEO

|      |                                                                                                                                                                                                                                                                                        |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PASS | <b>ALT text coverage</b> — Only 1 image found without alt attribute across all 379 files. Outstanding.                                                                                                                                                                                 |
| FAIL | <b>transportin-loro-caja-viaje-01.png = 1.8 MB (CRITICAL)</b> — The newly-added crate photo is an uncompressed PNG on the homepage and Transportines page. At 1.8 MB it will heavily impact LCP Core Web Vitals. Must be converted to WebP and compressed to under 150 KB immediately. |

|      |                                                                                                                                                                                                                                              |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| WARN | <b>cacatua-01.jpg = 563 KB</b> — Over the 300 KB threshold. Optimise to under 200 KB or convert to WebP.                                                                                                                                     |
| WARN | <b>57 gallery images are JPG (not WebP)</b> — Converting to WebP would save 30-40% file size across all gallery pages.                                                                                                                       |
| WARN | <b>Gallery images missing width/height attributes</b> — The .pg-item img tags in the 4 category pages do not include width/height. Browser cannot reserve layout space and CLS (Cumulative Layout Shift) is triggered on every gallery page. |
| WARN | <b>5.5 MB video (shinda-daphne.mp4)</b> — If embedded without lazy loading or CDN this will severely impact page speed. Consider hosting on YouTube and embedding via iframe.                                                                |
| PASS | <b>Lazy loading</b> — loading="lazy" used consistently on gallery and secondary images.                                                                                                                                                      |
| PASS | <b>Descriptive filenames</b> — Keyword-rich Spanish filenames (e.g. comida-para-loros-mezcla-premium-01.jpg). Good SEO practice.                                                                                                             |

## 6 · PERFORMANCE

|      |                                                                                                                                                                                                                   |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FAIL | <b>1.8 MB PNG on homepage — biggest LCP risk</b> — The transportines crate photo needs immediate conversion to WebP and compression to under 150 KB. This alone could worsen LCP by 1-2 seconds.                  |
| PASS | <b>Minimal JavaScript</b> — Only lang-switcher.js and nav toggle. No heavy frameworks. Excellent baseline for a static site.                                                                                      |
| PASS | <b>Netlify CDN / static hosting</b> — Global CDN, Brotli compression, edge caching. Solid infrastructure.                                                                                                         |
| WARN | <b>No resource hints (preconnect/preload)</b> — No preconnect to Google Fonts or GA4 in the HTML head. Adding preconnect for fonts.googleapis.com and fonts.gstatic.com reduces connection setup time measurably. |
| WARN | <b>Gallery images not WebP</b> — 57 JPG images served without WebP alternative. Homepage already uses picture+WebP for hero images — extend this pattern to all gallery sections.                                 |
| WARN | <b>Google Fonts potential render-blocking</b> — Consider adding font-display: swap to prevent invisible text during font load on slow connections.                                                                |

## 7 · MOBILE UX

|      |                                                                                                                                                                                                   |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PASS | <b>Homepage responsive layout</b> — Hero, species grid, trust badges, and CTAs render well on mobile. Mega-nav collapses to hamburger correctly.                                                  |
| FAIL | <b>Blog pages have no hamburger menu</b> — Blog uses a flat toptnav that wraps on mobile. On screens under 400px width nav links stack awkwardly. No mobile drawer for any of the 106 blog posts. |
| WARN | <b>Photo gallery grid on mobile</b> — .pg-grid collapses to 2 columns as intended. However 140px image height on mobile is very short — consider 160-180px minimum.                               |
| PASS | <b>Touch targets</b> — CTA buttons are large and well-spaced. Nav links in mobile drawer adequately sized.                                                                                        |
| WARN | <b>Contact form on mobile</b> — Should be visually tested on actual devices. Field spacing, label clarity, and submit button tap area need confirmation.                                          |
| PASS | <b>Typography</b> — Poppins (headings) + Open Sans (body) at readable base sizes with adequate line height.                                                                                       |

## 8 · PARROT SEO AUTHORITY

|      |                                                                                                                                                                                                                                                                                                                                                                           |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PASS | <b>Species coverage (ES)</b> — African Grey (Yaco), Macaw (azul-amarillo, jacinto, escarlata), Cockatoo (Cacatua), Amazon (Loro Amazonico), Eclectus, Conure, Budgerigar, Cockatiel, Lovebird (Agapornis), Caique all covered. Solid breadth.                                                                                                                             |
| FAIL | <b>9 species comparison posts linked but MISSING (404)</b> — eclectus-vs-yaco, cacatua-alba-vs-cacatua-galerita, guacamayo-azul-amarillo-vs-guacamayo-escarlata, loro-gris-africano-vs-loro-amazonico, loro-amazonico-vs-eclectus, como-cuidar-un-guacamayo, cuanto-vive-un-loro-gris-africano, que-come-un-loro-gris-africano, banar-loro-guia-completa. All return 404. |
| WARN | <b>Missing species pages: Pionus, Poicephalus/Senegal, Caique detail</b> — Growing niche demand in Spain and Portugal with zero coverage.                                                                                                                                                                                                                                 |
| WARN | <b>Missing budget buyer guides</b> — No pages for "loro barato Espana", "loro menos de 300 euros" or "loro economico". Significant commercial keyword gap.                                                                                                                                                                                                                |
| PASS | <b>Pillar-satellite cluster for Criadero</b> — Correctly implemented: pillar criadero-loros-espana + 5 satellites. Strong topical authority signal.                                                                                                                                                                                                                       |
| WARN | <b>No species lifespan pages</b> — "Cuanto vive un loro gris africano?" is high-volume informational. Linked-to internally (broken links) but pages not created.                                                                                                                                                                                                          |

## 9 · BLOG

|      |                                                                                                                                                                                                                      |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PASS | <b>Volume and depth</b> — 70 articles, 5 clusters (Compra, Precios, Cuidados, Especies, Legalidad). Most posts 700-1,900+ words. Category filter UI working.                                                         |
| FAIL | <b>Blog nav completely different from main site</b> — All 106 blog posts use a separate custom navbar. Creates disconnected experience and prevents authority link equity flowing between blog and commercial pages. |
| WARN | <b>Title truncation in SERPs</b> — Multiple blog titles exceed 60 chars (89, 88, 83 chars found). Recommend trimming all to 50-58 chars maximum.                                                                     |
| PASS | <b>Article schema</b> — Present on all 171 blog files with author, datePublished, publisher, image.                                                                                                                  |
| WARN | <b>Related posts inconsistency</b> — Some older posts have no related post section. Reduces time-on-site and internal link equity distribution.                                                                      |

## 10 · MULTILINGUAL

|      |                                                                                                                                                                               |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PASS | <b>Portuguese (/pt/)</b> — 50 pages — Homepage, 7 money pages, 13 city pages, 27 blog posts, contact. Content in native Portuguese (pt-PT). Well-structured.                  |
| PASS | <b>French (/fr/)</b> — 44 pages — Section exists with species pages, blog, cities, about, contact.                                                                            |
| FAIL | <b>FR pages have ZERO entries in sitemap.xml</b> — All 44 French pages absent from sitemap. Google cannot reliably discover FR content via the sitemap. Major indexation gap. |
| FAIL | <b>hreflang on ES pages — only 35% coverage (132/379)</b> — 247+ ES pages missing hreflang annotations. The international SEO triangle ES-PT-FR is broken for most pages.     |
| PASS | <b>Language switcher (lang-switcher.js)</b> — ES PT FR switcher present on all 377 files. URL mapping with 50+ entries. localStorage save. Dynamic hreflang injection.        |

**WARN** **GSC property for /fr/ not confirmed** — No GSC URL-prefix property for paraisodeaves.com/fr/. Cannot monitor FR crawling or click data. Create URL-prefix property in GSC.

## 11 · TRUST & LEGAL COMPLIANCE

**FAIL** **No Privacy Policy page (GDPR VIOLATION)** — politica-privacidad.html does not exist. The Netlify contact form collects personal data (name, email). Under GDPR (EU 2016/679) and Spain's LOPDGDD, a Privacy Policy is legally mandatory. Active compliance risk.

**FAIL** **No Cookie Policy / Cookie Banner (LSSI-CE violation)** — GA4 sets cookies on every page visit. Spanish AEPD requires explicit cookie consent + a cookie policy before non-essential cookies are set. No cookie banner exists anywhere.

**FAIL** **No Terms of Service** — No condiciones-generales.html. For a commercial site selling live animals (300-3,000+ EUR), T&Cs; covering purchase, returns, health guarantee, and shipping are essential.

**PASS** **Nosotros / Facility page** — Present with E-E-A-T signals: 25+ years history, CITES compliance, Ley 42/2007, Reglamento CE 338/97, legal registration.

**PASS** **Contact form** — Netlify form on homepage with Nombre, Email, Pais, Producto, Mensaje. Redirects to gracias.html.

**WARN** **No testimonials / reviews page** — High-ticket purchases require strong social proof. No testimonios.html or review widget exists.

**WARN** **Health guarantee not documented** — Mentioned in-text but no standalone page. A formal health guarantee page significantly improves buyer confidence.

**PASS** **Shipping page (entrega.html)** — Exists and covers Spain + Europe. delivery-shipping.html 301-redirects correctly.

## 12 · CONVERSION

**PASS** **Homepage hero** — Compelling headline, trust pills (CITES, Envios Europa, Atencion personalizada), two clear CTAs. Strong visual hierarchy.

**FAIL** **tienda.html shows "Mostrando 0 productos" (CRITICAL)** — Main store page renders completely empty. JS product filter data is missing or broken. Any visitor sees zero products and bounces. Highest-urgency conversion fix on the site.

**PASS** **Species pages CTAs** — Available-birds pages include Product schema, descriptions, and contact prompts. Clear path to inquiry.

**WARN** **Single contact method (email only)** — Only paraisodeloros@gmail.com. No phone, chat, or scheduling. For buyers in Latin America, email delays lose sales. Consider a Calendly booking link.

**WARN** **No urgency / scarcity signals** — No "X aves disponibles ahora", no waitlist CTA. Scarcity signals drive faster decisions for high-demand species.

**WARN** **No testimonials on homepage or species pages** — Adding 2-3 real customer quotes would significantly improve first-time visitor conversion rate.

## 13 · SECURITY

|      |                                                                                                                                                                                                                         |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PASS | <b>HTTPS</b> — Netlify provides automatic TLS. All canonical URLs use <a href="https://www.paraisodeaves.com">https://www.paraisodeaves.com</a> .                                                                       |
| WARN | <b>No Netlify _headers file</b> — No security headers configured. Recommend adding: X-Frame-Options: SAMEORIGIN, X-Content-Type-Options: nosniff, Referrer-Policy: strict-origin-when-cross-origin, Permissions-Policy. |
| PASS | <b>Form spam protection</b> — Netlify forms support honeypot. No exposed backend endpoint. <code>data-netlify="true"</code> used correctly.                                                                             |
| WARN | <b>No Content Security Policy (CSP)</b> — Low risk for static site but a restrictive CSP would prevent XSS injection risk from any future third-party scripts.                                                          |
| PASS | <b>No mixed content</b> — All resources use relative paths or HTTPS URLs.                                                                                                                                               |

## 14 · ACCESSIBILITY

|      |                                                                                                                                                                                                                                |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PASS | <b>ALT text</b> — Only 1 image missing alt across 379 files. Outstanding.                                                                                                                                                      |
| PASS | <b>Color contrast</b> — #1F3D2B dark green on #F8F5F0 cream: estimated contrast ratio over 7:1. WCAG AAA compliant.                                                                                                            |
| PASS | <b>ARIA labels</b> — Nav uses <code>aria-haspopup</code> , <code>aria-expanded</code> , <code>role="menu"</code> , <code>role="menuitem"</code> . Mobile nav uses <code>aria-modal="true"</code> and <code>aria-label</code> . |
| WARN | <b>Heading hierarchy</b> — Audited first 80 files: no duplicate H1s or missing H1s found. Full 379-file coverage audit recommended.                                                                                            |
| WARN | <b>Keyboard navigation</b> — Mega-nav is button-triggered (correct) but full keyboard tab traversal and Escape-to-close need visual testing.                                                                                   |
| WARN | <b>Lang attribute on FR pages</b> — All ES pages have <code>lang="es"</code> , PT pages <code>lang="pt"</code> . Confirm all 44 FR files use <code>lang="fr"</code> .                                                          |

## 15 · INTERNAL LINK GRAPH

|      |                                                                                                                                                                                                                                                                           |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FAIL | <b>16 broken internal link targets (404)</b> — 9 species comparison posts, 6 /disponibles/ sub-pages, and /cites-loros-espana.html at root. These generate crawl errors and send PageRank to dead ends.                                                                   |
| WARN | <b>criadero-de-loros-espana.html legacy links</b> — The <code>noindex + redirect</code> is in place, but updating all internal links to the canonical destination directly would be cleaner and faster for Googlebot.                                                     |
| PASS | <b>T1 pillar pages have at least 3 inbound links each</b> — <code>cuanto-cuesta-mantener-un-loro</code> , <code>cuidados-basicos-de-un-loro</code> , <code>documentos-legales-para-adoptar-un-loro</code> , <code>errores-comunes-al-adoptar-un-loro</code> all verified. |
| WARN | <b>Latinoamerica 20-country pages dense cross-linking</b> — 20 pages cross-link heavily to each other. Consider reducing cross-country links to funnel more authority toward the ES criadero conversion funnel.                                                           |

## 16 · SITEMAPS

| Category                            | Count           | Status                                         |
|-------------------------------------|-----------------|------------------------------------------------|
| Total sitemap URLs                  | 298             | PASS                                           |
| Spanish (ES) pages                  | ~248            | PASS                                           |
| Portuguese (PT) pages               | 50              | PASS                                           |
| French (FR) pages in sitemap        | 0 of 44         | FAIL — ALL MISSING                             |
| available-birds/ pages              | 10              | WARN — .html not clean URLs                    |
| Blog posts                          | ~70             | PASS                                           |
| City pages (ciudades/)              | ~40             | PASS                                           |
| Broken sitemap URLs (confirmed 404) | 0               | PASS — all files exist                         |
| Priority consistency                | 0.70-0.90 mixed | WARN — 0.88 non-standard on some PT city pages |

**FAIL** **44 French pages completely absent from sitemap** — All /fr/ content invisible to search engines via sitemap. Add all 44 /fr/ pages with lastmod and hreflang annotations immediately.

**WARN** **Priority values** — Simplify to 4 tiers: 1.0 (homepage), 0.9 (money pages), 0.8 (blog pillars / city hubs), 0.7 (supporting content). Remove non-standard 0.88 values.

## 17 · 404 AUDIT

**FAIL** **16 internal broken links -> 404** — 9 comparison blog posts (eclectus-vs-yaco, cacatua-alba-vs-cacatua-galerita, guacamayo-azul-amarillo-vs-guacamayo-escarlata, loro-gris-africano-vs-loro-amazonico, loro-amazonico-vs-eclectus, como-cuidar-un-guacamayo, cuanto-vive-un-loro-gris-africano, que-come-un-loro-gris-africano, banar-loro-guia-completa), 6 /disponibles/ pages, /cites-loros-espana.html (root).

**PASS** **Custom 404 page** — 404.html exists and configured as catch-all in \_redirects.

**PASS** **No broken CSS or JS assets** — global.css and lang-switcher.js referenced consistently across all pages.

**WARN** **/cites-loros-espana.html (root) -> 404** — Linked from pages. Correct file is /blog/cites-loros-espana.html. Fix: add 301 redirect in \_redirects pointing to the blog post.

## 18 · CONTENT EXPANSION OPPORTUNITIES

| Priority | Content Opportunity                              | Rationale                                                         |
|----------|--------------------------------------------------|-------------------------------------------------------------------|
| CRITICAL | 9 comparison blog posts (currently broken links) | Fix 16 broken links + add high-value comparison content           |
| CRITICAL | Política de Privacidad + Cookie Banner + T&C;    | GDPR/LSSI-CE legal requirement — active compliance risk           |
| HIGH     | Budget guide: "loro barato Espana"               | High commercial intent, low competition, zero coverage            |
| HIGH     | Testimonios / Reviews page                       | Critical social proof for high-ticket (300-3,000 EUR) conversions |

|        |                                                     |                                                                       |
|--------|-----------------------------------------------------|-----------------------------------------------------------------------|
| HIGH   | Garantia de salud page                              | Formal health guarantee builds buyer confidence for live animal sales |
| HIGH   | Pionus, Senegal, Caique species pages               | Growing niche demand with zero coverage currently                     |
| MEDIUM | FR city pages (Lyon, Marseille, Toulouse, Bordeaux) | Expand /fr/ to match /pt/ city structure                              |
| MEDIUM | Regional ES: Pais Vasco, Galicia, Murcia            | Expand regional commercial footprint                                  |
| LOW    | Species lifespan pages (cuanto vive X)              | High info intent, long-tail, easy to create                           |
| LOW    | Loros segunda mano / rescate                        | Niche but real search demand in Spain                                 |

## 19 · HOMEPAGE AUDIT

|      |                                                                                                                                                                                                                    |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PASS | <b>Hero section</b> — Full-width background image (guacamayos). H1: "Loros Criados con Amor, Listos para Tu Hogar". Trust pills (CITES, Envios Europa, Atencion personalizada). Two CTAs. Strong visual hierarchy. |
| PASS | <b>Species grid</b> — Visual cards (Yaco, Guacamayo, Cacatua, Amazona, Eclectus, Conuro, Agapornis) with images and links.                                                                                         |
| PASS | <b>Tienda / Accesorios section</b> — 4 category cards (Jaulas, Comida, Juguetes, Transportines) with real photos and correct hrefs to individual category pages.                                                   |
| PASS | <b>FAQ section + schema</b> — FAQPage JSON-LD implemented.                                                                                                                                                         |
| PASS | <b>Schema richness</b> — WebSite (with SearchAction), Organization (with knowsAbout), PetStore/LocalBusiness (Lliria address). Structured for Knowledge Panel signals.                                             |
| WARN | <b>No testimonials on homepage</b> — Adding 2-3 real customer quotes above the FAQ section would significantly improve conversion for first-time visitors.                                                         |
| WARN | <b>Competing CTA sections</b> — Tienda/Accesorios and "Comprar por Region" appear in close proximity. Visual hierarchy between commercial hubs may need refinement.                                                |
| FAIL | <b>Transportines image = 1.8 MB PNG</b> — The crate photo on the homepage card needs immediate compression/WebP conversion to protect LCP Core Web Vitals score.                                                   |

## 20 · FINAL SCORECARD

| Area                | Score /100 | Primary Issues                                                                                |
|---------------------|------------|-----------------------------------------------------------------------------------------------|
| Technical SEO       | 62         | hreflang on only 35% of pages; 44 FR pages not in sitemap; 196 pages missing Twitter cards    |
| Content Quality     | 68         | 3 thin money pages under 450w; tienda.html empty; 16 broken links; no legal pages             |
| Performance         | 65         | 1.8 MB PNG on homepage; 57 gallery JPGs not WebP; no resource hints                           |
| UX / Mobile         | 70         | Blog nav inconsistency (106 pages); no mobile hamburger on blog; gallery img height too short |
| Authority / E-E-A-T | 66         | No testimonials page; no health guarantee; nosotros.html thin (530w)                          |
| Image SEO           | 55         | 1.8 MB uncompressed PNG; 57 non-WebP gallery images; missing width/height on gallery imgs     |
| Internal Linking    | 60         | 16 broken link targets; /disponibles/ 6 dead pages; legacy URL links remaining                |
| Multilingual        | 48         | 44 FR pages NOT in sitemap; hreflang on only 35% of ES pages                                  |
| Conversion          | 64         | tienda.html empty (0 products); no testimonials; no urgency signals; single contact method    |
| OVERALL             | 63         | 7 critical blockers require immediate attention before any next phase of work                 |

### PRIORITY IMPLEMENTATION TABLE

**READ-ONLY AUDIT:** No changes have been made. Implement fixes one phase at a time to avoid regressions.

#### CRITICAL — Fix Immediately

| #  | Issue                                                        | Impact                | Scope      |
|----|--------------------------------------------------------------|-----------------------|------------|
| C1 | tienda.html shows 0 products (JS data empty)                 | Conversion / Revenue  | 1 page     |
| C2 | 44 FR pages missing from sitemap.xml                         | Indexability / FR SEO | 44 pages   |
| C3 | 16 broken internal links -> 404                              | Crawl / UX / Trust    | 16 targets |
| C4 | No Privacy Policy / Cookie Banner (GDPR + LSSI-CE violation) | Legal compliance risk | All pages  |
| C5 | transportin-loro-caja-viaje-01.png = 1.8 MB on homepage      | LCP / Core Web Vitals | 2 pages    |
| C6 | Blog nav completely different from main site                 | UX / Authority flow   | 106 posts  |
| C7 | /disponibles/ 6 pages linked but directory is empty          | Crawl / UX            | 6 targets  |

#### HIGH PRIORITY — Fix This Sprint

| #  | Issue                               | Impact            | Scope      |
|----|-------------------------------------|-------------------|------------|
| H1 | hreflang missing on 65% of ES pages | International SEO | 247+ pages |

|     |                                                         |                          |               |
|-----|---------------------------------------------------------|--------------------------|---------------|
| H2  | criadero-loros-espana.html only 407 words (thin)        | SEO Rankings             | 1 page        |
| H3  | comprar-loros-espana.html only 432 words (thin)         | SEO Rankings             | 1 page        |
| H4  | loros-especies.html only 385 words (thin)               | SEO Rankings             | 1 page        |
| H5  | Title tags over 60 chars on 15+ pages (SERP truncation) | CTR                      | 15+ pages     |
| H6  | Twitter card missing on 196 pages                       | Social sharing           | 196 pages     |
| H7  | OG tags missing on ~20 pages                            | Social sharing           | ~20 pages     |
| H8  | 9 comparison blog posts linked but not created          | Broken links + Authority | 9 new posts   |
| H9  | 57 gallery images not WebP                              | Performance              | All galleries |
| H10 | available-birds/ pages missing hreflang                 | International SEO        | 9 pages       |

### MEDIUM PRIORITY — Next Month

| #   | Issue                                               | Action                                                            |
|-----|-----------------------------------------------------|-------------------------------------------------------------------|
| M1  | nosotros.html thin (530 words)                      | Expand to 1,200+ words with facility photos and timeline          |
| M2  | No testimonials / reviews page                      | Create testimonios.html or embed Google Reviews widget            |
| M3  | No health guarantee page                            | Create garantia-salud.html with formal guarantee terms            |
| M4  | Terms of service missing                            | Create condiciones-generales.html (with legal counsel)            |
| M5  | Gallery img missing width/height (CLS risk)         | Add explicit width/height to all .pg-item img tags                |
| M6  | Meta descriptions over 155 chars (10+ pages)        | Shorten all to 145-155 chars max                                  |
| M7  | No Netlify _headers file (security headers missing) | Add X-Frame-Options, nosniff, Referrer-Policy, Permissions-Policy |
| M8  | No preconnect for Google Fonts + GA4                | Add preconnect links in head on all pages                         |
| M9  | GSC property for /fr/ not confirmed                 | Add URL-prefix property for /fr/ in Google Search Console         |
| M10 | /cites-loros-espana.html (root) -> 404              | Add 301 in _redirects to /blog/cites-loros-espana.html            |

### LOW PRIORITY / FUTURE IMPROVEMENTS

| #  | Issue / Opportunity                                        | Notes                                                          |
|----|------------------------------------------------------------|----------------------------------------------------------------|
| L1 | 8 English stub files in codebase                           | Delete or fully replace with proper ES content                 |
| L2 | cacatua-01.jpg 563 KB oversized                            | Compress to under 200 KB or convert to WebP                    |
| L3 | shinda-daphne.mp4 5.5 MB on server                         | Host on YouTube/Vimeo, embed via iframe with lazy load         |
| L4 | Blog topbar link "buy-parrots-europe" broken               | Update to /comprar-loros-espana or correct target page         |
| F1 | FR city pages (Lyon, Marseille, Toulouse, Bordeaux, Lille) | Expand /fr/ to match /pt/ city structure for FR topical depth  |
| F2 | Pionus, Poicephalus, Lorikeet species pages                | Growing niche demand in Spain and Portugal — zero coverage now |

|    |                                                            |                                                             |
|----|------------------------------------------------------------|-------------------------------------------------------------|
| F3 | Google Reviews / Trustpilot widget                         | Embed on homepage + species pages for live social proof     |
| F4 | Budget buyer guide (loro barato Espana)                    | High commercial intent, low competition keyword gap         |
| F5 | Regional ES: Pais Vasco, Galicia, Murcia, Castilla y Leon  | Expand regional commercial footprint beyond 6 current pages |
| F6 | Backlink acquisition (mascotahogar.com, expertoanimal.com) | Main limiting factor for moving from position 14 to page 1  |
| F7 | Cookie consent management platform (e.g. Cookiebot)        | GDPR-compliant cookie management for GA4 and future scripts |
